

Tourism Operator Sustainability Training Course

Overview

Unlock the Future of Tourism: Training Series on Regenerative & Sustainable Tourism

Step into the next era of destination management with our dynamic 5-part training course designed for tourism operators ready to lead the shift toward regenerative and sustainable tourism.

This hands-on, action-oriented virtual course covers everything from foundational principles and global best practices to team & community engagement, climate action, and regenerative practices implementation. Whether you're just starting your sustainability journey or looking to level up, this training empowers you with the tools, strategies, and real-world examples needed to create lasting change.

A large, jagged iceberg floats in the ocean. In the lower-left foreground, a dark-hulled ship with a white superstructure is visible. The ship's name, "PLANCERIS", is printed on its side. The ship is positioned near the base of the iceberg. The water is dark and calm, reflecting the light. The sky is overcast and grey. The overall scene conveys a sense of scale and environmental impact.

“Tour operators face the urgent need to strengthen their focus on the climate challenge and take action now, ensuring that climate considerations are embedded into core business strategies and daily operations—both for immediate impact and long-term resilience, not merely as a compliance exercise.”

Your Session Coaches

Jill Doucette

Founder & CEO

Jill Doucette has been a driving force at Synergy since its establishment in 2008. Her dedication to uniting business, industry, and communities positions her as a leader in fostering a sustainable, low-carbon future. As a corporate sustainability leader with over fifteen years of experience working with companies and industry associations to advance sustainability, she brings a wealth of knowledge from various sectors and practical experience implementing sustainability practices.
